ABSTRACT

This publication presents detailed data on student enrollment at institutions of higher education from Fall 1984 to Fall 1993 in 24 tables (though most tables include data from 1991 through 1993 only). The data are from the Higher Education General Information Survey (HEGIS) and the Integrated Postsecondary Education Data System (IPEDS). The data reported here pertain only to accredited institutions. Highlights of the data include: (1) in 1993 1.2 percent fewer students enrolled than in 1992, the first decline in total enrollment since 1984 and due entirely to a 3 percent decrease in the number of white, non-Hispanic undergraduate students; (2) the decrease in white student enrollment was offset by increases in enrollments among all other racial/ethnic groups as well as by non-resident aliens; (3) numbers of minority students enrolled increased in public institutions by 2.6 percent; (4) the enrollment of both men and women declined with the number of men decreasing at a slightly higher rate than that of women; (5) full-time enrollment decreased by less than one-half of 1 percent while part-time enrollment decreased by more than 2.3 percent; and (6) most of the enrollment declines were in 2-year institutions which is reasonable since the number of part-time students declined and 57 percent of all part-time students attend 2-year schools. The tables present the data broken down by various combinations of the following factors: control of institution, level of institution, race/ethnicity, sex, and full-time vs. part-time enrollment. INTRODUCTION

This E.D. TABS presents findings from two institutional-based postsecondary education fall enrollment surveys conducted by the National Center for Education Statistics: the Higher Education General Information Survey (HEGIS), and the Integrated Postsecondary Education Data System (IPEDS) surveys which replaced HEGIS in 1986. HEGIS contains biennial enrollment data by racial/ethnic category from 1976 to 1984. IPEDS collected racial/ethnic enrollment biennially from 1986 to 1990. Since 1990, the race/ethnicity data have been reported annually. The data reported here pertain only to institutions accredited at the higher education level by an agency recognized by the Secretary of the U.S. Department of Education.

HIGHLIGHTS

In the fall of 1993, 14,306,000 students were enrolled in higher education institutions. This was about 180,000 fewer students than were enrolled in the fall of 1992. This 1.2 percent drop in total enrollment between 1992 and 1993 is the first decline in total enrollment since 1984 (table 1a) and was due entirely to a decrease in the number of white, non-Hispanic students when enrollment in all institutions is considered. Their numbers decreased by 270,000 or 2.5 percent between 1992 and 1993, the second year in a row that their numbers decreased (table 1).

The decrease in white student enrollment was partially offset by increases in enrollments among all other racial/ethnic groups as well as among nonresident aliens. The number of Hispanic and Asian/Pacific Islander students increased by 3.6 and 3.9 percent, respectively, while the number of American Indians/Alaskan Natives and nonresident aliens increased by 2 percent. The number of black, non-Hispanic students increased by 1.3 percent (table 1)[1].

In addition to occurring only among white, non-Hispanics, the decline in total enrollment occurred exclusively among undergraduates whose numbers decreased by 1.7 percent. The number of graduate students increased by 1.2 percent, while the number of first-professional students increased by slightly over 4 percent (table 1). The decline in enrollment also occurred only in public institutions, with their enrollments declining by 1.7 percent. Private institutions increased enrollments slightly by one-half of 1 percent. These declines, taken in combination, resulted in a 3 percent decrease in the number of white, non-Hispanic undergraduates and a decrease of 3.1 percent in the number of white non-Hispanic students in public institutions.

The picture of minority enrollment was somewhat different from that of whites. Their numbers increased in public institutions by 2.6 percent. In private institutions, American Indian/Alaskan Native enrollments declined by 4 percent, while the enrollment of blacks, Hispanics and Asians or Pacific Islanders increased, by 1.3, 3.8 and 5.2 percent, respectively; white enrollment declined by .2 percent. Additionally, between 1992 and 1993 the number of minority undergraduate students increased by 2.1 percent in private institutions.

---

[1]The decrease in enrollment of whites and the increases among minorities are not necessarily a reflection of changes in participation rates. Between 1992 and 1993 the participation rate of white and black 18- to 24-year-olds decreased slightly while the participation rate of Hispanic 18- to 24-year-olds increased slightly (*Digest of Education Statistics* (table 172), Washington, D.C.: U.S. Department of Education, National Center for Education Statistics, 1994).

The enrollment of both men and women declined, with the number of men decreasing at a slightly higher rate than that of women. The number of men declined by 1.5 percent while the number of women declined by 1.1 percent (table 3). White men's enrollment dropped 3.1 percent in public institutions and 1.1 percent in privates between 1992 and 1993. White women's enrollment decreased 3.2 percent in public institutions but increased slightly in private institutions. The enrollment of men and women of color increased in both public and private institutions, although the enrollment of black men in private institutions was unchanged and the number of American Indian/Alaskan Native men and women decreased in private institutions (tables 1b and 1c).

From tables 1d and 1e it would appear that most of the decline in enrollment occurred among part-time rather than full-time students. Full-time enrollment decreased by less than one-half of 1 percent while part-time enrollment decreased by more than 2.3 percent. There were 1.7 percent fewer white full-time students enrolled in 1993 than in 1992 and over 3.5 percent fewer part-time white students enrolled.

Table 2 indicates that most of the enrollment declines were in 2-year institutions. This is reasonable since the number of part-time students declined and 57 percent of all part-time students attend 2-year schools (table 2d). The decline in enrollment in 4-year institutions was less than one-half of 1 percent, while enrollment was down 2.7 percent in 2-year institutions. The enrollment of white students was down in both 4- and 2-year institutions, but in 2-year institutions it was down over 4 percent, while in 4-year institutions it was down less than 1.5 percent. The number of minority students increased in 4-year institutions for all minority groups, ranging from a 2.5 percent increase for black students to an almost 7 percent increase for American Indian/Alaskan Natives. The number of black and American Indian/Alaskan Native students in 2-year institutions declined but the number of Hispanic and Asian/Pacific Islander students increased in 2-year schools.

Total fall enrollment declined in 30 states between 1992 and 1993. The largest decline was registered in California, with a drop of over 7 percent (tables 5a and 5b). The 5.8 percent drop in enrollment in Nebraska was the second largest of all the states. Fourteen states had drops in enrollment greater than the national average decline of 1.2 percent. However, some states did have increases in enrollment. States with the largest percentage increase were Utah, with a 3.8 percent increase, Georgia with a 3.1 percent increase, Hawaii with a 2.8 percent increase, and New Mexico with a 2.2 percent increase.

Tables 1a-4 indicate the share of enrollment of students from each of the 5 racial/ethnic groups, as well as students who are nonresident aliens. As may be seen from table 1a, although 74 percent of all students were white, non-Hispanic in 1993, white students have had a decreasing share of total enrollment since 1984 while all minority groups have increased their share of enrollment as have nonresident aliens.

This pattern of a declining share of enrollment for white, non-Hispanic students and increased shares of enrollment for all other racial/ethnic groups and nonresident aliens is generally the same for students in public institutions (table 1), men and women (tables 1b and 1c), full- and part-time students (tables 1d and 1e), students in 4- and 2-year institutions (table 2), and students at all levels of enrollment (undergraduate, graduate and first-professional) (table 4).

Other points of interest from the 1993 enrollment data include:

> The share of enrollment in public institutions was down for the second year in a row. In 1993, 78.2 percent of all students attended public institutions, down from the 78.6 percent in 1992 and the 78.8 percent in 1991 (table 1a).

Women continued to increase their share of total enrollment. In 1993 women comprised 55.1 percent of the students in higher education institutions, compared to their 55 percent share in 1992 and the 54.7 percent share in 1991 (tables 1b and 1c).

Forty-three percent of students enrolled in the fall of 1993 were enrolled part-time. This was down slightly from the 44 percent that were enrolled part-time in 1992.

Four-year institutions accounted for 61.1 percent of all student in 1993, up slightly from their 60.5 percent share in 1992.

NOTE: Because of underreporting/nonreporting of racial/ethnic data, data prior to 1986 were estimated, when possible. See Technical Notes for a discussion of imputation procedures used for underreported and nonreported racial/ethnic data since 1984. Also 1992 data may differ from that in prior publications due to corrections and the addition of late data. Detail may not sum to total due to rounding.

NOTE: Because of underreporting/nonreporting of racial/ethnic data, data prior to 1986 were estimated, when possible. See the Technical Notes for a discussion of imputation procedures used for underreported and nonreported racial/ethnic data since 1984. Also, 1992 data may differ slightly from that in prior publications due to corrections and the addition of late data. Due to rounding, detail may not add to totals.

TECHNICAL NOTES

Data Sources

The enrollment statistics by racial/ethnic category in this report are derived from two data sources. The information for 1984 comes from data reported biennially by institutions of higher education in the Higher Education General Information Survey (HEGIS), "Fall Enrollment and Compliance Report of Institutions of Higher Education." The data for 1986 through 1993 are from information reported by institutions of higher education through the Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment" survey. The IPEDS racial/ethnic data were reported biennially between 1986 and 1990, and annually since 1990.

It should be noted that data reported for 1991 and 1992 in this report differ somewhat from those reported in other sources. Modifications have been made to the 1991 and 1992 data with the addition of late arriving data as well as corrections and updates forwarded by institutions.

Overview of Methodology

The Fall Enrollment survey (EF) is conducted annually by the National Center for Education Statistics (NCES) as part of the IPEDS. IPEDS collects enrollment data from all postsecondary education institutions in the United States and its outlying areas.[2] However, data for this report are exclusively from higher education institutions (i.e., those institutions that are accredited at the college level by an agency recognized by the Secretary, U.S. Department of Education) in the 50 States and the District of Columbia. Data from noncollegiate institutions are not included.

Students **included** in the Fall Enrollment survey:

- students enrolled in courses creditable toward a degree or other formal award;
- students enrolled in courses that are part of a vocational or occupational program, including those enrolled in off-campus centers; and
- high school students taking regular college courses for credit.

Students **excluded** from the Fall Enrollment survey:

- students enrolled exclusively in courses not creditable toward a formal award or vocational program;
- students enrolled exclusively in remedial courses;

---

[2]Enrollment data for institutions of higher education were previously collected by the Higher Education General Information Survey (HEGIS), in operation from 1966 to 1985. Institutions of higher education now form a subset of the IPEDS universe and are identified by the presence of a FICE code on the file.

- students exclusively auditing classes;
- students studying abroad (e.g., at a foreign university) if their enrollment at the institution is only an administrative record and the fee is only nominal;
- students in any branch campus located in a foreign country; and
- students exclusively earning continuing education units (CEU's).

Institutions Surveyed and Response Rates

Some version of the 1993 Fall Enrollment survey was sent to 3,602 higher education institutions in the summer of 1993. Table 7 shows the number of higher education institutions that received the 1993 Fall Enrollment survey (or the Consolidated form) by level and control of institution; the number institutions that responded; and the response rates. The response rate is based on the number of in-scope institutions responding to the 1993 survey divided by the number of institutions receiving the survey. Table 8 shows the response rates by institutional sector and by state.

Follow-up

As part of the enrollment survey follow-up procedures, nonresponding institutions were contacted by letter and telephone. These institutions were asked to provide the total number of men and women enrolled, by level of enrollment and total enrollment, by race/ethnicity and sex.

Editing

All data were edited for major reporting errors. Generated totals were compared to reported totals and replaced the reported totals when they were within an acceptable range. Data were also compared to the prior year's response for consistency of reporting. Institutions were contacted to resolve major reporting discrepancies.

Imputations

Although the HEGIS and IPEDS data reported here are historically comparable in terms of the reporting institutions (i.e., those accredited at the college level by agencies recognized by the Secretary, U.S. Department of Education), there are some differences in the imputation procedures used in the two surveys.

In HEGIS, data for totally nonresponding institutions (i.e., those that did not return an enrollment survey form), were imputed whenever possible by using previously reported information. In a few cases, imputations could not be performed; as a result total enrollment as well as enrollment by racial/ethnic category may be underestimated. For responding institutions with incomplete or missing racial/ethnic data, the racial/ethnic data were not imputed. However, this was not a major problem because totals by racial/ethnic category were always within 0.3 percent of the actual totals.

In IPEDS, a procedure similar to that used for the prior HEGIS surveys is followed in that previously reported information is used if it is available. If no previously reported data are available, imputations are based on current year group means or ratios derived from similar institutions with reported data in both the previous and current year.

Additionally, in IPEDS for responding institutions with incomplete racial/ethnic data, reporting, the difference between the sum of enrollment across the racial/ethnic categories and the reported totals is redistributed based on the distribution of the racial/ethnic enrollment reported by the institution. For institutions with missing racial/ethnic data, data are imputed by using the distributions of racial/ethnic enrollment reported by institutions in the same state and of the same level and control. Prior to 1986 (i.e., HEGIS survey years), data were imputed only for institutional totals and not across racial/ethnic categories. As a result of the distribution process, in the transition between HEGIS and IPEDS, enrollment counts increased proportionately for all racial/ethnic categories including nonresident aliens.

Table 9 indicates the percent of enrollment that was imputed by state and institutional control and level. The reader should be aware that a large percentage of imputed data may affect the quality of that data at the state level and at the national level as well.

Race/Ethnicity Unknown

Beginning in 1990, a "race/ethnicity unknown" category was incorporated into the Fall Enrollment survey. To allow for analysis of enrollment trends by race/ethnicity, enrollment reported in the race/ethnicity unknown category are distributed across all racial/ethnic categories based on the institution's reported racial/ethnic distribution. These data, however, are not distributed to the nonresident alien category.

Cautionary Notes

Table 4 contains data by level of study (undergraduate, graduate, and first-professional). The reader is cautioned that the level of study data presented here may differ from data in other NCES publications. HEGIS data, which appear in publications prior to 1986, contained information on unclassified students, by level (only undergraduate and graduate student categories).

Table 7.--Number of higher education institutions and response rates, by control and level of institution: 50 states and the District of Columbia, Fall 1993

Control and level of institution	Final Universe	Responded	Response rate
